TO WHOM IT MAY CONCERN

Meet Solanki's Reference

This is to confirm that Meet Solanki took a Computer Science undergraduate course (Database Management Systems: Comp-3150) with me in Winter 2024, a 3rd year database management system course, which he completed with an excellent score of 90%. Meet Solanki is a brilliant and hard-working student, who is on track for graduation in 2026 from our 4-year Bachelor of Science (Honors, Computer Science with Software Engineering Specialization) program with a current cumulative grade point average (gpa) of 82.27%. Apart from teaching Meet Solanki as an instructor, he worked with me in my Woddlab Database lab as an undergraduate student research assistant under the Ignite work study program for two terms of Fall 2025 and Winter 2026. He demonstrated a strong interest and contributed to database/data mining projects and wrote a conference paper from assigned research project entitled "Performance, Patterns, and Path from SQL to NoSQL", which he presented as a poster in the Ontario Database conference, OnDB on Dec. 12, 2025 at Western University, London. He also worked as a Teaching Assistant (TA) for several courses at the University of Windsor. He was on Dean's Honor Roll in 2023/2024 and 2024/2025 sessions for maintaining an overall cumulative gpa greater than 80%.

From Meet Solanki's transcript, I can see that he is a very academically strong student, who has passed most core undergraduate courses with excellent grades including courses such as COMP 3150 Database Management Systems 90%, COMP 3220 Obj-Oriented Software Anal/Des 92%, COMP 3300 Operating Systems Fundamentals 96%, COMP 2120 Obj-Oriented Progrmg Using Java 86%, COMP 2310 Theoretical Fdns: Computer Sci 67%, COMP 2540 Data Structures & Algorithms 69%, COMP 2560 System Programming 80%, COMP 2140 Language, Grammar & Translators 84%, COMP 2660 Comp Architre II:Micro Program 83%.

Meet Solanki has strong communication skills, is a quick and efficient programmer with great independent problem-solving skills, a very reliable and respectful man who works well with others, and ensures he completes all tasks assigned to him. He has expressed his interest in securing good industrial position or pursuing graduate studies in Computer Science in your school, and I have no doubt that he will succeed in any such job or graduate program.

I highly recommend Meet Solanki for any software development job or admission into MSc/PhD program in Computing or Computer Science in the areas of his research interest. I have confidence that he will do well in whichever path he chooses to pursue. He has the drive, motivation, intellectual abilities, strong relevant educational background, maturity and communication skills to succeed in jobs or graduate programs. I will not hesitate to hire or admit him into our own equivalent job or graduate program if there is vacancy.

Sincerely,

Signed (CIE)

Dr. Christie Ezeife

Professor, School of Computer Science
